

Hello Montana Families,

As part of Superintendent Arntzen's "Montana Learn" initiative to promote math and reading achievement, the OPI is encouraging students to stay engaged in learning during the summer break. With the school year wrapping up, we are working with Meta Metrics to promote free summer reading and math resources that families can take advantage of.

The OPI's [website](#) has links to summer reading and math challenges that tailor book lists or math lessons to students interests and ability. This is meant to reinforce what they learned in the previous school year. There are also achievement certificates that can be printed.

Information about the summer reading and math challenges can be found here: <http://opi.mt.gov/Families-Students/Summer-Learning-Challenges>

Have a great summer and don't hesitate to reach out if you have any questions.

Best,

Dylan Klapmeier
